Mr Matt Brunt
All Party Parliamentary
Light Rail Group

Dear Mr Brunt,

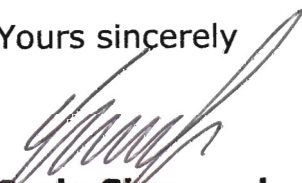

**The All-Party Parliamentary Light Rail Group
(APPLRG)**

I am writing in response to your call for evidence relating to the continued and future development of light rail services. I have been working with advanced technologies in the field of accurately mapping buried structures and utilities for the past 16 years. Having read your brief I am convinced that one of the most costly and problematical risks associated with such developments is the lack of trustworthy information on buried utilities.

With this in mind I would like to present the attached document titled "The need for accurate information on buried utilities"

My contact details are:
craig.Simmonds@subtechnics.com
Mobile number:07899 981908
Office Number:01483 230080

Yours sincerely

**Craig Simmonds
Director**
