# First Citadis tram sold in China

13 Apr, 2015

Shanghai has placed a €72 million order with Alstom's Chinese joint venture for 30 new Citadis trams – becoming the first Chinese city to adopt the technology.

Shanghai Alstom Transport Co (SATCO), a joint venture between Alstom and Shanghai Rail Traffic Equipment Development Co, will supply light rail vehicles for the first two lines of a planned six-line system in the Songjiang district of Shanghai.

The trams will be built in China by SATCO while Alstom sites in France and Italy will supply the traction systems, bogies, the Train Control and Monitoring System (TCMS) and provide technical support. Songjiang plans to construct six tram lines, totalling 800 kilometres, by 2020. The first 30 trams will operate on lines T1 and T2. The lines are set to open by 2017.
