Vinnytsia presents a modernised tram for €160 000.

21 Sep 2015

UKRAINE:

Vinnytsia tram operator VTTU has unveiled a KT4SU tram which it has modernised at a cost of €160 000. New features include streamlined cabs and interior LED lighting.

According to VTTU, the modernised tram will reduce energy consumption up to 40%.

Can be modified to standard gauge, high low platform version

VTTU purchased 80 KT4SU trams from ČKD Tatra between 1980 and 1990; 44 of these are currently in service.

These have been augmented by second-hand trams procured from Zürich since 2006.

The 40.2 km metre gauge network in Vinnytsia is electrified at 600 V DC.

In December 2014 a 1.9 km extension opened from Barske Shosse to Vyshenka.

This meeting by invitation only, where MPs, Stakeholders etc., within the Light Rail industry and invited members of the Public will have a chance to discuss debate and raise questions concerning Light Rail & Trams.
