

LIBERTY

Modern Streetcars

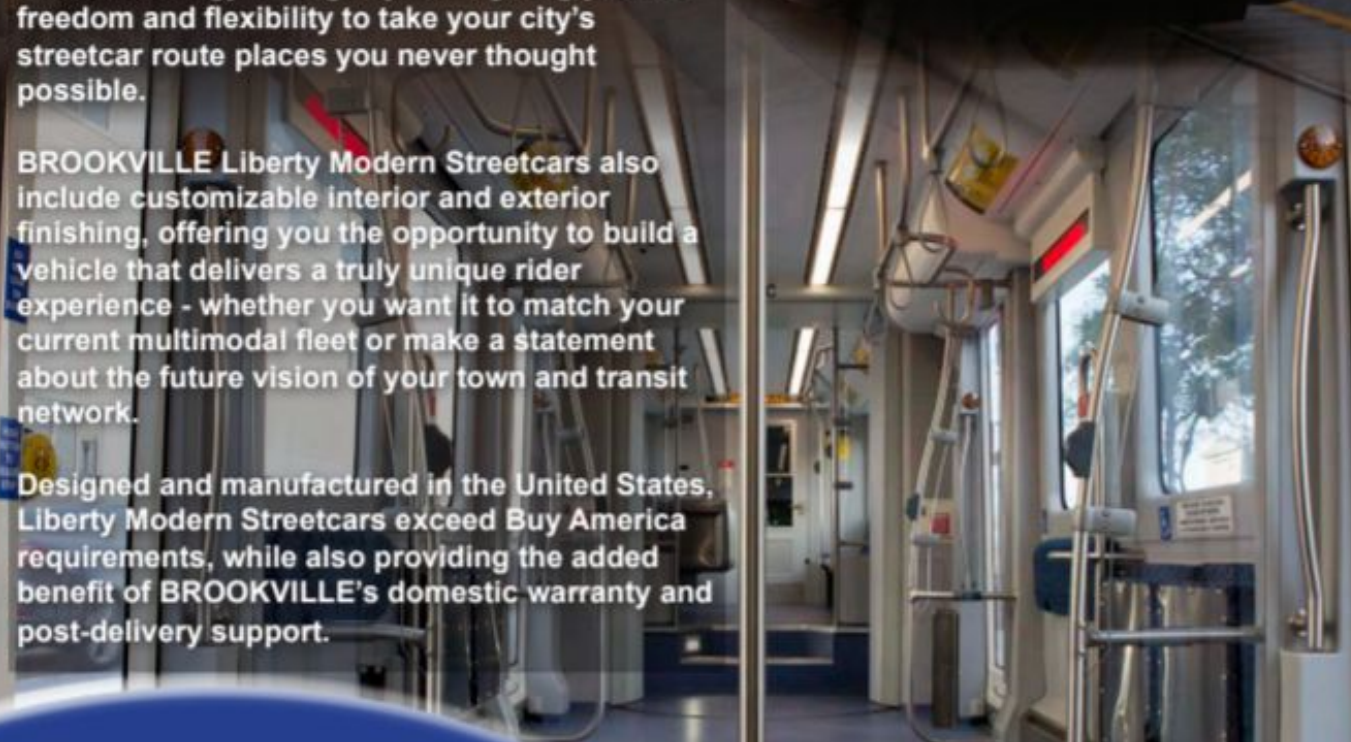

Tomorrow's Transit Today.

With a sleek, modern exterior design, versatile interior, and complete integration of the latest service-proven breakthroughs in vehicle technology, Liberty Modern Streetcars are a truly innovative, American manufactured vehicle solution for United States cities.

Key innovations include an automatic leveling system, providing station-level boarding, and an onboard energy storage system, giving you the freedom and flexibility to take your city's streetcar route places you never thought possible.

BROOKVILLE Liberty Modern Streetcars also include customizable interior and exterior finishing, offering you the opportunity to build a vehicle that delivers a truly unique rider experience - whether you want it to match your current multimodal fleet or make a statement about the future vision of your town and transit network.

Designed and manufactured in the United States, Liberty Modern Streetcars exceed Buy America requirements, while also providing the added benefit of BROOKVILLE's domestic warranty and post-delivery support.
