Lund Tramway

Date

26 . 04 . 2022

At the Swedish Architects' Gala on 7 April, the Swedish Transport Administration (Trafikverket) awarded [Lund Tramway](https://www.steconfer.com/en/portfolio/project/735/lund-tramway) the Architecture Award 2021 for a carefully designed and well-functioning infrastructure facility. According to the jury, the tramway between Lund C and ESS is "a green urban building element that connects old and new and which has already become an obvious element in the cityscape".

We are very proud and happy to have been involved in this project where Steconfer built a complete overhead contact line system and installed 5.5 km overhead contact line with 10 gears, of which 2 are complete cross gears.
