

Steconfer was founded in 1997 starting with track works. It grew steadily and sustainably adding rail electrification and rail signalling installation to its portfolio. Recently the company widened its portfolio to all rail systems supporting its client needs and rail market development.

Geographically Steconfer expanded its coverage from Europe where it started to Asia, Africa and America, establishing a Group of companies that allow for a Global coverage of performance for almost all rail services ranging from design through construction to maintenance of rail infrastructure projects, mainly focused actually in Light Rail, MRT and Metro urban transportation projects.

ISO certification also testifies its commitment to top quality, safety and environmentally friendly work performance, in its way to become the BEST rail services provider.
